

CURRICULUM VITAE

DO NHU TAI

PERSONAL INFORMATION

Name:	DO NHU TAI	Birthday:	January 30th, 1983
Email:	donhutai@gmail.com	Phone:	(82) 010-9128-9618
Homepage:	http://dntai.vneasy.net http://github.com/dntai	Nationality:	Vietnamese

WORKPLACES

Current work: Researcher
Time Period: From 08/2017 – current
Workplace: Department of Artificial Intelligent Convergence
Chonnam National University
77 Yongbong-ro, Yongbong-dong, Buk-gu (61186), Gwangju, South Korea
Advisor Professor: Prof. Kim Soo-Hyung
Laboratory: Pattern Recognition Lab - Room 331, Building 7
Website: <https://prlabjnu.github.io/>

RESEARCH INTERESTS

- Pattern Recognition, Computer Vision, Medical Image Analysis, Deep Learning,
- Emotion Recognition, Hand Gesture Recognition, Knee Bone Tumor Detection, Face Tracking

EDUCATION

2017 – Current: Department of Artificial Intelligent Convergence, Chonnam National University, South Korea (<http://jnu.ac.kr>)

- Major: Artificial Intelligent Convergence in Doctor of Philosophy in Engineering with 36/36 credits and GPA 4.5/4.5.
- Graduation thesis: “*Facial Emotion Recognition Using Context-Aware Spatio-Temporal and Temporal-Pyramid Models*”, advised by Prof. Kim Soo-Hyung, defended in June 2021.

2013 – 2016: Faculty of Computer Science and Engineering, International University, Vietnam National University, Ho Chi Minh City (<http://www.hcmiu.edu.vn>)

- Certificate: Master of Engineering in Information Technology Management (GPA in scale 100: 84.8 – Very Good)
- Graduation thesis: “*A Speeded-up temporal median filter and its application for background modelling in video surveillance*”, advised by Dr. Le Thanh Sach, defended on March 2016 at 3B Ly Tu Trong, Ben Nghe Ward, District 1, HCMC

2001 – 2005: Faculty of Information Technology, Ho Chi Minh City University of Foreign Languages - Information Technology (<http://www.huflit.edu.vn>)

- Certificate: Bachelor of Information Technology (GPA in scale 10: 8.71 – Very Good)
- Graduation thesis: *Applying wavelet in image and video compression problems*, advised by Dr. Vu Thanh Hien, defended on August 2005 at 155B, Su Van Hanh Street, Ward 13, District 10, HCMC.

WORKING EXPERIENCE

08/2021 – Current: Researcher at Pattern Recognition Lab, Department of Artificial Intelligent Convergence, Chonnam National University, South Korea.

2017 – 08/2021: Ph.D. Candidate and Research Assistant, Department of Artificial Intelligent Convergence, Chonnam National University, South Korea.

2005 – 08/2017: Lecturer, Faculty of Information Technology, Ho Chi Minh City University of Foreign Languages - Information Technology (HUFLIT) (<http://www.huflit.edu.vn>).

AWARDS

Awards in Ph.D studying at Chonnam National University

- Best Presentation Award:
 - Tram-Tran Nguyen-Quynh, **Nhu-Tai Do**, Soo-Hyung Kim, "**MLEU: Multi-Level Embedding U-Net for Fully Automatic Image Colorization**," Proc. Int. Conf. Machine Learning and Smart Computing(ICMLSC 2020), pp. 119-123, Haiphong City, Vietnam, Jan. 2020. (BRL) (Best Presentation Award)
- Best Paper Award:
 - **Nhu-Tai Do**, Tram-Tran Nguyen-Quynh, Thanh-Hung Vo, 정성택, 김수형, "**Seg-Unet 및 Dice Loss 를 이용한 방사선 사진에서의 End-to end 뼈 종양 분할**," 2019 년도 한국컴퓨터종합학술대회 논문집(KCC 2019), pp. 799-801, 제주 ICC, 2019 년 6 월. (BRL/LINC+) (★우수논문) (End-to-End Knee Bone Tumor Segmentation and Classification from Radiographs using Seg-Unet and Dice Loss)
- Challenges:
 - 2019 Korean Emotion Recognition Challenge, Position 3rd
<https://www.kaggle.com/c/kercc>
 - Affwild2 Challenge 2019, Position 4th
<https://ibug.doc.ic.ac.uk/resources/fg-2020-competition-affective-behavior-analysis/> (Team: CNU_ADL)
 - EmotiW Challenges 2019, Position 6th
<https://sites.google.com/view/emotiw2019>

Awards in Vietnam

- Certificate of Merits of Vietnam Union of Science and Technology Associations for supervising students in Vietnam Olympiad Information Technology Student Contest and ACM/ICPC Contest (2015)
- Consolation prize in Student Scientific Research of Ministry of Education and

Training (2005) with research “*Applying Wavelet in Image and Video Compression Problems*”.

- 3rd prize of super cup block in Vietnam Olympiad Information Technology Student Contest (2005)

PROJECTS

01/2020 – current: BRL Project (Korea Basic Research Funding) – Period 2:

- Topic: Emotion Pain and Multi-Modal

12/2019 – current: Medical Prognosis:

- Topic: Knee Bone Tumor on MRI sequences

03/2018 – 01/2019: Medical Project:

- Topic: Knee Bone Tumor Detection from X-ray images

04/2018 - 05/2018: AI Challenge: Fake Face Detection from GAN

- Topic: Fake Face Detection from GAN

10/2017 – 12/2019: BRL Project (Korea Basic Research Funding) - Period 1:

- Topic: Emotion Recognition and 3D Face Emotion
- Topic: Face Tracking
- Topic: AffWild2 Challenge (02-03/2020)
- Topic: Korean Emotion Challenge (KERC) (09-11/2019)
- Topic: EmotiW Challenge (05-07/2019)

09/2017 - 12/2018: Hand Gesture Recognition

- Topic: Hand Gesture Recognition

06/2015 – 12/2016: Graduation thesis “*Speed Up Temporal Median Filter and Its Application in Background Estimation*”

- It is a part of project “Vision-based Traffic Parameter Estimation and Visualization” sponsored by Dept. of Science and Technology in Ho Chi Minh City
- Mainly focus on:
 - The proposed thesis’s objectives is to speed-up the filter using GPU (Graphics Processing Unit).
 - The speeded-up temporal median filter will be also analyzed for background modelling problem in video surveillance.
 - Expected results of thesis are a new technique for speeding-up the temporal median filter using GPU is proposed and it is faster than recently developed algorithms, the effectiveness of the proposed temporal median filter is analyzed for the background modelling problem to show features on computation time and on the accuracy.
- Project was implemented in C/C++, OpenCV, MFC and Cuda.

10/2012 – 05/2015: Joining Computer Vision Group of Faculty of Computer Science and Engineering, International University, Vietnam National University, Ho Chi Minh City

- Research GPU algorithms for Image/Video Processing using CUDA
- Research Numerical methods, Image/Video Processing algorithms
- Support Cuda algorithm for paper “*Subsequent Processing of Background Modeling for Traffic Surveillance System*”.

10/2004 – 08/2005: Bachelor thesis “*Applying Wavelet in Image and Video Compression Problems*”

- The objective of the thesis focused on the rate, quality compression capabilities along with scalability in image and video compression compared to JPEG and MPEG compression standard. The approach of the project is based on wavelet theory, wavelet transform applied to the problem of image compression, video and a number of algorithms used to quantize the wavelet coefficients as SPIHT, CSPIHT.
- Project was implemented in C/C++, MFC.
